AUXILIARY HYDRAULIC LINE KITS & INSTALLATION

When you want top of the line performance and productivity from your excavator attachment, AMI's auxiliary hydraulic line kits deliver reliability in the harshest work conditions.

AMI sells and installs custom-built, high-quality and durable auxiliary hydraulic line kits made by HydraulCircuit Technology, Inc. The kit is available as part of your purchase of a new AMI Attachments product and can also be installed on used equipment.

Pro-Link Thumb

Tilt Ditching Bucket

Mat Grapple

TUBING

The heavier wall tubing that connects directly to the hose assembly is custom-fabricated and pressure-tested with Pulse MIG welded ends to guarantee durability.

CLAMPS

For a tight fit, the heavy-duty, steel clamps are custom-designed to match the tubing and can stand up to applications in tough environments.

CONNECTIONS

The design of the manufacturer-approved SAE ORFS or Code 62 Flange weld ends that match the host machine meets and usually exceed the SAE specifications, while significantly minimizing the chance for leaks with fewer connections.

CONTROLS

Kits offer a variety of control options, including lightweight joysticks, durable pedal valves, and pilot valves with a narrow profile manifold.

KIT TYPES

SINGLE ACTING / 1-WAY

Breakers
Compactors
Mulchers

DOUBLE ACTING / 2-WAY

Thumbs
Tilting Buckets
Grapples
